

W-Series
Next-Gen Proline

1/2 TO 6 HP MULTI-REFRIGERANT AIR COOLED CONDENSING UNITS

The Next Generation of Prolines are Here!

Witt's Next-Gen Proline W-Series ½ through 6 HP condensing units are engineered with an exciting new design that provides increased efficiency, more standard features, easier serviceability, and more catalogued options.

Next-Gen Prolines are ideally suited for use in a variety of commercial applications such as cafeterias, convenience stores, restaurants and fast food outlets while providing the versatility to excel in a full array of other applications. These new W-Series units provide a winning combination of high quality, increased flexibility and greatly improved efficiency for even lower long-term operating costs.

The small profile product line is designed to utilize R404A or other low GWP refrigerants R407A, R407C and R448/ R449A. Units are available with low-cost hermetic or efficient and quiet scroll compressors. The standard Next-Gen W-Series is rated for operation in ambient air temperatures up to 110°F.

Integral Subcooling Circuit

All Next-Gen Proline units feature an integral subcooling circuit that allows saturated liquid to flow from the receiver to the condenser where the refrigerant is subcooled by ambient air. This provides an average of 3 to 5°F of subcooling for higher efficiency while assuring optimal expansion device operation.

Next-Gen Proline Condensing Units

Standard Features

WBH/WBO Models

- Low-cost Hermetic or quiet and efficient Scroll compressor
- All-weather - Galvanized steel painted housing
- Generously sized high efficiency condenser, enhanced copper tubes/aluminum fins
- Integral Liquid Subcooling Circuit provides subcooled liquid to the expansion device
- Base mounted shut-off valves placed external to cabinet for easy access
- Liquid line kit with filter/drier and sight glass with moisture indicator
- Suction line piping
- Larger electrical panel with hinged/removable door
- Color coded point-to-point wiring
- Refrigerant receiver with isolation valve and pressure relief plug
- Crankcase heater
- PSC condenser fan motor(s) with EC motor option
- Encapsulated high pressure (auto reset) and low pressure (auto reset) controls (adjustable low pressure control is standard on low temperature models)
- Electronic defrost timer with defrost contactor/relay on low temperature models (2 evaps. maximum)
- Electronic air defrost timer (Medium temperature models only)
- UL and cUL listed for indoor or outdoor use

WFH/WFO models also include flooded head pressure control as standard feature

Easy access / removable control panel door
Color-coded and numbered point-to-point wiring for easy maintenance

Quick access to shut-off valves from exterior

Replaceable core liquid and suction filters available as an option for 4 to 6 HP models

Options

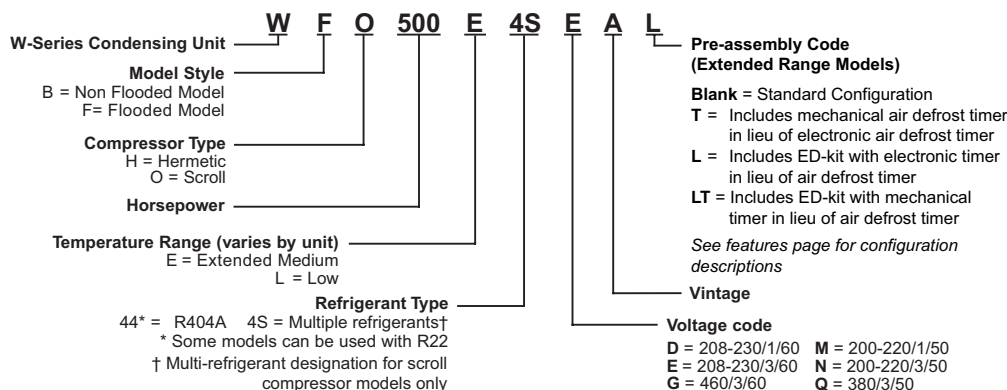

- Suction Accumulator
- Oil separator (may not be available with mounted accumulator)
- Thru-the-door fused disconnect for cabinet sizes FM2 through FM4
- External fused or non-fused disconnect - loose or mounted
- Heated and insulated receiver
- Oversized receiver
- Adjustable high/low pressure control
- Hose option for adjustable pressure control
- EC condenser motor
- Pump down toggle switch
- Liquid line solenoid (loose or mounted)
- Phase loss monitor
- Hail / Snow Guard - loose or mounted
- Paragon mechanical timer in lieu of electronic timer
- Timer shipped loose in enclosure
- CPC timer
- 316 Stainless steel housing
- 50 Hz timer and/or defrost kit

MODEL NUMBER NOMENCLATURE

STD = Standard Feature
N/A = Not Available

*Liquid line kit includes: piping, filter drier, sight glass/moisture indicator.

**Adjustable low pressure control on low temperature models in lieu of fixed control.

^ Standard on extended medium temperature models only.

(1) Electric defrost kit is included on low temperature models and optional for medium temperature models - see electrical data pages 15-17.

See specification pages 18-19 for compressor horsepower.

* Each asterisk represents a variable character based upon model, voltage, and vintage ordered. See page 4 for complete nomenclature.

† Estimated dBA values at 10 feet from the unit. Correction factors: Deduct 6 dBA for 20 to 40 feet, 12 dBA @ 40 to 60 feet. Ratings at the outlet of the discharge air. The actual measurements may vary depending upon installation variables. Environmental factors may have a significant influence on this data.

†† See back page for associated drawings.
