

# PRODUCT INFORMATION NOTICE

# HTPG

*PIN No:* SER- 22  
*Date:* Sep 2005  
*By:* Ann Alvarado  
*Issue:* 9/30/2005

*Subject:* **All HTPG products, which includes Russell, Witt, Coldzone and Kramer products, that have been submerged in water and/or mud due to weather conditions or otherwise.**

## **All HTPG refrigeration products are included in this notice.**

Submersion of the product in water and/or mud may pose a hazard to the surrounding environment, as well as the equipment. Product safety and reliability cannot be substantiated after the product has been submerged in floodwater and/or mud. The degree of damage cannot be assessed without extensive evaluation of the product.

The task of evaluation of such a degree, involves destructive inspection, which makes usability of the product impractical.

### **ACTION:**

Any HTPG product that becomes submerged in water and/or mud must be replaced, regardless of age of service or the whether the product is designed for indoor, or outdoor use. This includes products that have been submerged prior to being installed or product still in the original packaging.

Please place this bulletin in your catalog and the notice in your **PIN** manual for future reference.
