Subject: Ceiling-Temp Low Height Unit Coolers Update

By: Raleigh Thompson

PIN #: C-LIT-81

Issue: Nozzle Selection and New
Refrigerants

Date: 11/12/2018

The following changes have been made to the ColdZone Ceiling-Temp Low Height Unit Coolers brochure for product updates, new refrigerants, and add distributor nozzle and expansion valve selections.

- Brochure now reformatted to current ColdZone design
- Removed shaded pole motors - no longer available
- Updated R404A BTUH capacities and included R407A, R448A, and R449A/B BTUH capacities
- Added distributor nozzle and expansion valves for air and electric defrost models

Action:

Please let your customers know of these product changes. The revised brochure CZ-CTA-0818A replaces publication number 119.6. The updated brochure is available in PDF format only at this time and will be posted on the website.
