

PRODUCT INFORMATION NOTICE

PIN No: LIT- 78
Date: October 27, 2017
By: Karen Alvarado
Issue: Next-Gen II 3 to 22 HP Units
Subject: Literature Revision

The following revisions have been made to Russell's Next-Gen II 3 to 22 HP Air Cooled Condensing Unit literature.

- Revised Dept. of Energy Annual Walk-in Energy Factor (AWEF) Ratings table
- Added note to pressure relief valve (see below)
 - * Models in FD1 cabinet include a fusible plug for pressure relief. See price list for optional pressure relief valve. Models in FD2 and FD3 cabinets include a pressure relief valve.
- Revised low temperature capacity tables to add a -10°F column
- Options - Liquid line solenoid - no longer offered mounted at the condensing unit

Please refer to the Russell Next-Gen II product catalog **RU-NG2-0917A** for up-to-date information and available options. The new PDF is posted on the website. Printed copies will be available soon and can be ordered from the literature warehouse by using the form on the website at <https://russell.htpg.com/literature-request/>. Previous copies of Next-Gen II literature are located in the obsolete literature section of the Russell website at: <https://russell.htpg.com/literature/obsolete-literature/>.

ACTION:

Distribute this information to your Reps and customers as required. Retain this notice for future reference.

Thank you.
