Issue:
Subject: Easy-Flo Redesign

Be advised that the low air velocity evaporator model line, Easy-Flo, has been redesigned. Units are now identified with a new “smart” part number and range in capacity from 5,000 to 34,000 Btuh @ 10°F TD.

Please review the enclosed product literature and supplemental price sheet for further information regarding this product. Place these items into your catalog for future reference.

This information is now accessible on the Witt website at <http://witt.htpgusa.com> and is available for order from the literature warehouse.
